

## Sign and Channel Letter Information

AI Innovations is dedicated to providing superior service in the Sign Industry. Whether you need a custom illuminated cabinet or something standard, we will build it to accommodate your customer's installation preference and needs. Our standard is to do everything we can to manufacture what your customer wants. By using AI Innovations to build your signs and channel letters you will be able to reduce your overhead and cut your labor costs all while increasing your revenue and net profit. We offer a wide variety of sign styles to choose from.

- Standard Extrusion Cabinets
- Custom Illuminated Sign Cabinets
- Post-N-Panel
- Custom Architectural Signs
- Routed Aluminum Faces
- Custom Aluminum Shapes
- Routed Polycarve
- Decorated Flexible Fabric Faces/ Heat Transfer or Vinyl Laminated
- Decorated Flat Poly Carbonate Faces
- Front and Backlit Channel Letters
- Flat Cut out Aluminum Letters
- Stud Mount Acrylic Letters

**Lighting-** AI Innovations will try to use your preferred lighting choice. However, our standard lighting for sign cabinets is high output fluorescent daylight lamps. We also offer "Slim Line" lights allowing for very narrow cabinets (4" deep). These are T5 Fluorescent lamps that last 20,000 hours and are extremely energy efficient.

For Channel Letters, we use state of the art L.E.D. illumination. LED offers better energy efficiency than neon and offers flexibility when it comes to brightness and color. All lighting and procedures are UL approved

**Graphics-** AI has the ability to incorporate graphics to any sign cabinet or face. We offer a wide variety of application methods and can work with you to customize your design.

**Manufacturing-** AI Innovations employs a highly trained staff and uses the latest technologies to produce a consistent grade of superior products. Work done in Graphics, Welding, Electrical, and Shipping Departments is unsurpassed in the market. Our production team works under an incentive based quality control mandate that minimizes errors and intercepts mistakes before they leave our doors. Quality control is integral at every stage and step in the process.

## Sign and Channel letter Information...Continued

**Production** – All Standard sign cabinets are manufactured with Sign Comp sign extrusions. All Custom cabinets are made from structural Aluminum Heavy wall tubes and Then skinned with .08 aluminum and powder coated to the specified color. All cabinets are pre-wired and ready to install. AI will ship directly to you or your customer.

Channel letters are manufactured using routed .063 aluminum backing and .040 aluminum channel coil that is pre-painted in a variety of colors. Letter Faces are made with 3/16" standard colored acrylic or .177 white acrylic with applied vinyl in specified color. The vinyl is used to achieve the desired look and color. Plastic Jewel Trim cap that comes in a variety of colors as well is applied to create the finished look. Channel letters are completed with LED Lighting and then shipped to your shop or job location.

**Packaging and Delivery-** AI Innovations carefully packages all signs and letters before they are shipped unless requirements specify otherwise. Each sign is inspected for quality and is cleaned before packing.

AI can deliver in its own fleet of trucks—this eliminates typical problems caused by common carriers. If the AI trucks are not a viable option, we will ship on your preferred carrier. Signs and letters are carefully packed and crated to make for easy and safe shipping.

AI Innovations serves its customers from four strategic manufacturing and distribution centers. The home office is in Indianapolis, IN and is within one day's transit to two thirds of the country's population. Our Other facility is located in Winston-Salem, NC.
